profili e cornici in legno

Alessandro Marchiani

Già dai primi del 1920, Augusto Marchiani, padre dell'attuale titolare Alessandro, lavorava, commercializzando legno, aste per mobili e quadri nel cuore di Firenze, restando per anni unico nel settore data la sua larga gamma di legnami provenienti da varie parti del mondo .

Nel 1985, con la prima fiera a Bologna, SACA EUROPE, la ditta espande le proprie conoscenze in mercati europei e mondiali, distribuendo il proprio prodotto

con tempi e costi contenuti restando leader nel settore della produzione e della vendita di materiale grezzo.

I legni utilizzati, sono generalmente: ramina, ayous, pino e abete giuntato.

Su richiesta è possibile utilizzare anche altre essenze legnose.

Nel 2008 l'azienda ha acquistato un impianto di giunzione per produrre internamente e così ridurre tempi di consegna, i costi ed essere più flessibili nelle quantità.

Si eseguono sagome su disegno del cliente:

lisce, stampate a caldo o pastellate.

Possiamo consegnare gli articoli del nostro catalogo in piccole quantità che sono pronte in magazzino.

From the beginning of 1920s Augusto Marchiani, father of the owner Alessandro, was already working in the wood trades, selling mouldings for furniture and for paintings in the heart of Florence.

He remained the sole trader for years due to his wide range of woods from various parts of the world.

In 1985, with the first exhibition in Bologna, SACA EUROPE, the company extends its products in european and global markets, distributing them in good time and at low cost.

This enables the company to remain a leader in the production and sale of raw material. The woods that are generally used are: ramina, ayous, pine and jointed spruce. Upon

request it is possible to use other types of wood.

In 2008 the company bought a joining system in order to have an internal production, thus reducing delivery times and costs, and to be more flexible

with quantity.

The company offers custom made designs, to the client's taste: smooth,

hot press or battered. We can

deliver items from our catalog in small quantities, that are ready in stock.

Matteo Marchiani

A close-up, shallow depth-of-field photograph of a pasta-making process. A large, dark, metallic die is positioned at the top right, extruding a continuous line of ridged, tubular pasta shapes. The pasta is falling into a light-colored wooden tray that runs horizontally across the middle of the frame. The background is blurred, showing more of the wooden structure of the machine. In the bottom right corner, there is a black rounded rectangle containing the text 'ASTE PASTELLATE' in a large, white, serif font, and below it, 'Pasta design' in a smaller, white, italicized serif font.
